Summary

Senior Backend Infrastructure Engineer with 9+ years designing scalable, full-stack architectures deployed in Docker/Kubernetes on AWS and Azure. Proven track record building high-concurrency, event-driven services and AI-driven automation workflows while leading CI/CD, infrastructure-as-code, and observability initiatives. Adept at delivering maintainable solutions across cloud platforms and cross-functional teams, with emphasis on performance, security, scalability, and observability.

Professional Experience

Full Stack AI Engineer, *Open Clouds*

10/2022 – 03/2026

- Designed containerized microservices with NestJS and Docker, orchestrated via Kubernetes on AWS EKS, achieving >99.9% uptime; improved availability by 15% YOY.
- Implemented infrastructure-as-code using Terraform/CloudFormation to provision VPC, RDS, and SQS, reducing provisioning time by 70% and MTTR by 25%.
- Developed high-concurrency APIs (10k RPS) with Node.js/TypeScript, leveraging Redis caching and AWS Lambda for burst traffic; sub-100 ms P99 latency under load.
- Integrated OpenAI APIs to power AI-generated content pipelines; automated image generation and text summarization, reducing manual content creation by 85%.
- Built CI/CD pipelines with GitHub Actions and Docker, delivering zero-downtime releases and 30% faster deployment cycles; cut rollback incidents by 40%.

Full Stack / System Engineer, *I2Prod*

07/2020 – 09/2022

- Architected event-driven data pipelines using AWS SNS/SQS and Kinesis for real-time processing of millions of events per day; end-to-end latency under 150 ms.
- Migrated legacy services to serverless Node.js Lambda functions, cutting operational costs by 40% while maintaining sub-100 ms latency for critical paths.
- Authored Terraform modules for repeatable provisioning of VPC, RDS, and ElasticCache, enabling multi-region failover and 99.95% regional resilience.
- Implemented structured logging (Winston + CloudWatch) and metrics (Prometheus) for end-to-end observability; reduced MTTD by 60%.
- Led Git branching strategy (GitFlow) and automated testing (Cypress, Playwright) integrated into GitLab CI; improved test coverage to 92%.

Web Developer, *The Coding Machine*

03/2018 – 06/2020

- Built full-stack web applications using React, Vue.js, and Node.js; improved development speed by 15% through tooling and reusable components.
- Developed REST and GraphQL APIs with optimized data handling; reduced deployment time by 30% using Docker and CI/CD pipelines.
- Collaborated with product and QA teams to deliver stable production systems; achieved 99.8% uptime across applications.

Education

Master's degree in Computer Science, *University of Gloucestershire*

09/2023 – 09/2024

Computer Science

England

Bachelor's degree of Computer Science, *Iqra University*

06/2014 – 02/2018

Computer Science

Pakistan

Most Recent Projects

Donation Platform

- Full-stack system for donation tracking and payments
- Integrated Stripe for secure transactions and automated receipts
- Built reusable frontend components with React; reduced processing errors by 25%.

AI Content Platform [🔗](#), *Software & AI Engineer*

- Full-stack AI platform using React, Next.js, and NestJS
- Integrated OpenAI APIs for image and content generation
- Designed scalable APIs and real-time processing workflows
- Cut content generation time by 60%

Online freelancing platform - JobDone [🔗](#)

- Full-stack contributions across frontend verification, backend Python/Django, and responsive UI
- Improved user engagement by 22% and reduced support requests by 18%

Technovation Town [🔗](#), *Software Developer*

- Built full-stack web applications using React, Vue.js, and Node.js;
- Built CI/CD pipelines with GitHub Actions and Docker

Core Skills

Programming Languages

JavaScript(ES6+) | TypeScript | Python | Go | C/C++ |
PHP | Java | Solidity | Rust

Backend

Node.js | Nest.js | Django | Flask | FastAPI | Laravel |
.NET | Spring Boot | Micronaut | Play Framework |
dApps |

Databases

PostgreSQL | MongoDB | Redis | Firebase | MySQL |
Oracle | Neon | DataBricks

Tools

Git | CI/CD | Docker | AWS

Architecture

Microservices | Event-driven systems | High-
concurrency APIs | Caching (Redis, ElastiCache) |
Observability

Frontend

Html5 | CSS3 | React | Ember.js | Angular.js | Vue.js |
Nuxt.js | Tailwind | CSS | Material UI | Bootstrap | Ant
Design | Qt

Cloud & DevOps

AWS (Lambda, EC2, S3, CloudFormation, RDS, SNS/
SQS) | Docker | CI/CD(GitHub Actions, Jenkins) | Azure |
Kubernetes

AI/ML

Open AI | TensorFlow | PyTorch

Industries

SaaS | Enterprise Software | Cloud Computing | DevOps
& Infrastructure | Finance & Fintech | Banking &
Payments | E-commerce | Insurance | Investment
Management | Healthcare
